Cystinosis Research Network 2025 Conference
Poster Session Requirements

- The Poster Session will take place during the CRN conference proceedings beginning on Friday, July 11 at the Amway Grand in Grand Rapids, Michigan and will remain on display for the entirety of the event. This session will showcase a mix of science, medicine, industry and advocacy group topics to provide an interactive experience for both family and professional attendees. Researchers, clinicians, industry and advocacy representatives will be invited to exhibit their latest research findings, treatment breakthroughs, and advocacy group updates.

- Research Poster Presenters are asked to provide two hand-outs describing their work: one is to be a brief discussion of the exhibit written in layman's terms; the second, a more detailed, technical discussion for the attending professionals. These hand-outs are to be available at the poster exhibit for the benefit of all those attending this session.

- Posters should be visually appealing, clearly communicate your research findings and are easily readable from a distance, usually with large fonts, clear graphics, and limited text density. All text should be legible from about four feet away. Displayed materials should be self-explanatory and should enhance the presentation and details.

- Posters/abstracts that do not meet standards of clarity, professionalism, and visual appeal will not be displayed.

- Poster session abstracts should be submitted to Kristina Sevel via email at ksevel@cystinosis.org no later than **June 5, 2025**.

- Posters should be no larger than 4' x 4' and will be displayed on easels.

- All costs associated with creation of the poster will be the responsibility of the entrants.

- Entrants must give permission for poster abstracts to be published with conference materials, as well as posted on the CRN website (www.cystinosis.org).

- For questions, please email Kristina at ksevel@cystinosis.org.

- Space is limited, CRN reserves the right to reject/remove any submitted abstract.
