

SCIENTIFIC SYMPOSIUM

Advancing the Future of Cystinosis Care

Friday, November 13, 2026 | Ann Arbor, MI

Weber's Hotel, 3050 Jackson Ave, Ann Arbor, MI 48103

Space is limited for this one-day gathering of physicians, clinicians, researchers, and scientists advancing care for cystinosis and other lysosomal storage disorders. Led by colleagues working directly in the field, sessions will move beyond broad overviews to examine emerging research, therapeutic development, clinical challenges, and questions shaping the future of care.

This symposium is an opportunity not only to hear from leaders in the field, but to engage with colleagues driving progress. Contribute to the discussion – register today!

The agenda features:

- Newborn screening for cystinosis
- Novel approaches to ocular drug delivery
- Gene, RNA, and cell-based therapies
- Lessons from therapeutic development in other lysosomal storage disorders
- Current challenges and opportunities in cystinosis care
- See agenda for more

Symposium Chair

Elizabeth Ames, MD, PhD

Clinical Assistant Professor in
Pediatrics and Internal Medicine,
University of Michigan Co-Director,
Michigan Medicine NORD
Rare Disease Center of Excellence
